

July 13, 2020

Dear Premier Community HealthCare Patient:

Given the daily changes that the COVID-19 outbreak is creating in our communities, we want to assure you that the health and safety of our patients and care team members remains our top priority. Visiting health care facilities, like any other location where many people gather or visit, may create a greater risk of exposure to COVID-19 virus. Premier Community HealthCare follows the CDC guidelines to reduce the transmission risks associated with the COVID-19 virus in our clinics. All exam rooms are being disinfected regularly and we are taking additional precautions to keep everyone safe. Visit our website www.premierhc.org to learn more about the additional safety measures and services we have in place to better serve you and keep everyone safe.

Please be aware that the symptoms of COVID-19 include fever, sore throat, coughing, difficulty breathing, headaches, muscle aches, and/or loss of taste. Contact your primary care doctor if you have any of these symptoms and make sure to let them know that you have recently visited a health care facility. For online resources, go to the CDC website www.cdc.gov or contact the Florida Department of Health COVID-19 call center available 24/7 at **(866)779-6121** or covid-19@flhealth.gov for more information on COVID-19 prevention, symptoms and what to do if you are feeling sick.

Thank you for trusting us with your healthcare needs. We are proud to be your patient centered medical home. If you would like to make an appointment or have any questions, please call Premier at (352) 518-2000/(727)-645-4185.

Sincerely,

Joseph D. Resnick, MHA, FACHE
Chief Executive Officer
